

Developing an Illinois Pretrial Tool

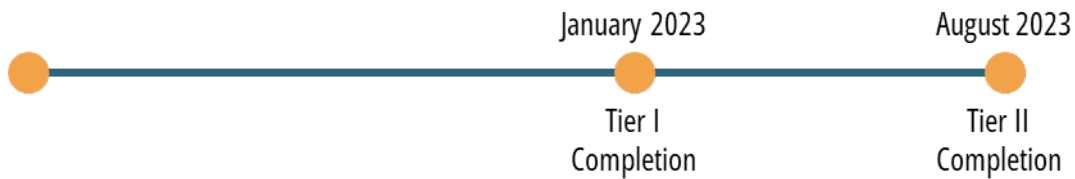

Objective

JSP, in partnership with the AOIC, will develop a statewide pretrial tool to standardize pretrial decisions throughout Illinois. This will occur in two tiers: *building and implementing the Tier I administrative tool and building and implementing the Tier II support tool.*

Benefits of participating

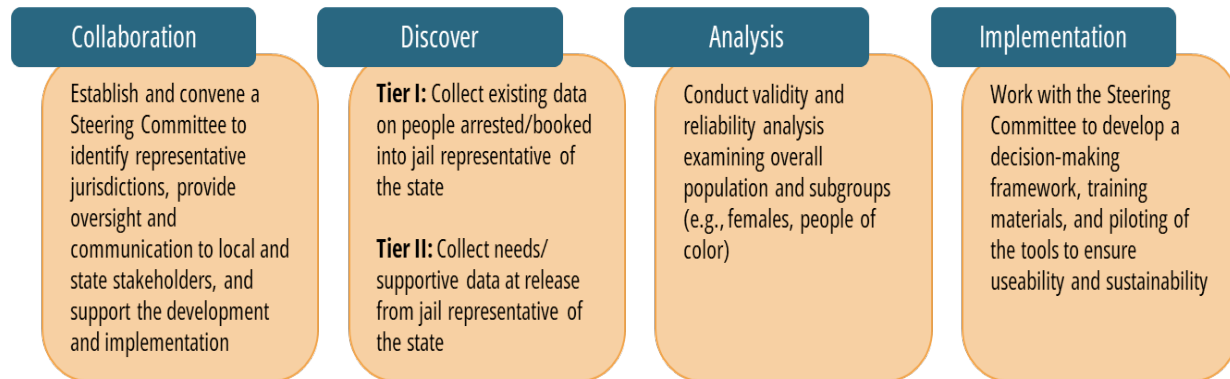

- ➔ Representation of your site's data in the development of a statewide tool.
- ➔ Opportunity to provide input in decisions made about the statewide tool.

Timeline

Process

In Tier I and Tier II, JSP will use a four-step process to develop the pretrial tool.

Participation Opportunities

Your site can participate in this project in any combination of ways, including:

- ❖ **Provide data only:** These jurisdictions would only provide the data needed to build the Tier I and/or Tier II tools.
- ❖ **Pilot the tool:** These jurisdictions would be a pilot site for implementing the Tier I and/or Tier II tools and examining reliability.
- ❖ **Steering Committee:** These jurisdictions would have a representative participate in the Steering Committee activities.
